

Button Names for the main menu screens

To alter the communicator is actually not super hard but it takes some understanding of how it works. First all the Options # are buttons, in order from top left to right then down row by row. Each screen has 16 buttons and 16 sounds. They are linked in the programming so that Option 1 is sound1.mp3 this naming on your sound files is critical for it to work. If you alter the sound files it will play a different sound. So this is how you customize it. Also the "Button Names" are actually the thing being said. So Option 1 is the button name, it plays "Can I go Outside." that plays audio file sound1.mp3 this is how you can customize the communicator to your needs. Please feel free to message on github if you need any help understanding or want to have me do the changes for you. I would be happy to help customize this app for people in need. I hope people get good use from this. God bless.

Screen 1 = Outside

Screen 2 = Doing

Screen 3 = Needs

Screen 4 = Talking

Screen 5 = Visitors

Screen 6 = Car

Screen 7 = Store

Screen 8 = Feelings

Screen 9 =ADL

Screen 10 = Regulation

Screen 11 = Questions
